

On-The-Job Training & Work Experience

On the Job Training

The Workforce Connection can help set up On-The-Job Training for your new employees.

The program is simple---when you hire one of our qualified participants on a full-time basis, you agree to train that person for up to six months and our program will reimburse you for 50% of the wage being paid to the new hire.

We'll help you find a good match by screening prospective job candidates. But, if you're interested in the program, talk to us first, because the OJT agreement must be signed and on file before the new hire starts to work.

Your involvement in the OJT program can be a win-win for all involved. You'll be able to hire a new employee and be reimbursed for a portion of the training cost.

Work Experience

The Work Experience program can be a great fit for potential employees with limited work histories. We have participants who need work experience and you have work that needs to be done.

Why WEX?

- We pay the participant's wages, FICA, and workers' compensation.
- Participants work part-time (maximum 30 hours per week) for a period of up to 360 hours.
- We pre-screen participants prior to placing them in the program to make sure they can perform the job.
